## New Requirements for Recreational and Commercial Shark Fishing Took Effect on January 1

NOAA Fisheries reminds highly migratory species vessels that the remaining new recreational and commercial measures implementing Amendment 5b to the 2006 Consolidated Atlantic HMS Fishery Management Plan become effective January 1, 2018.

Amendment 5b implemented a range of management measures to end overfishing and rebuild overfished dusky sharks. Other measures for Amendment 5b became effective June 5, 2017.

Who is effected? Amendment 5b could affect:

- Any commercial fishermen with HMS permits
- Any recreational fishermen who catch sharks of any species

On January 1, the following measures went into effect:

**Permit Requirements and Outreach:** Requires HMS permit holders fishing for sharks recreationally to obtain a shark

endorsement which requires the completion of an online shark identification and fishing regulation training course, plus additional recreational fisheries outreach. More information is available through the HMS Permits Shop at <https://hmspermits.noaa.gov>

### Circle Hook Requirement:

Requires the use of non-offset, non-stainless steel circle hooks by all HMS permit holders with a shark endorsement when fishing for sharks recreationally south of 41° 43' N latitude (near Chatham, MA- the northern extent of the dusky shark's

US Atlantic range), except when fishing with flies or artificial lures.

### Commercial Measures

Circle Hook Requirement: Requires the use of circle hooks by all HMS directed shark permit holders using bottom longline.

For further information, contact the HMS Management
